2. Monthly Revenue Trend with Moving Average

The trends of Sale Revenue and Moving Average of Sale Revenue from the previous 2 to the next 0 along Table (Across) for Date Month. Color shows details about Sale Revenue and Moving Average of Sale Revenue from the previous 2 to the next 0 along Table (Across).

- **Stable Core Revenue:** Maintained a steady monthly revenue baseline averaging ~₹1,060M (₹106 Cr) between Dec 2023 and Aug 2026.
- **Top Sales Month:** Reached peak performance in September 2024 (₹1,100M/₹110 Cr), driven by strong end-of-Q3 sales.
- **Low Trend Volatility:** The 3-month moving average confirms consistent recurring demand with minimal quarter-over-quarter fluctuation.
- **Active Month Partial Data:** September 2026 reflects in-progress data collection, accounting for the lower visible bar.

3. Category Revenue Breakdown

Sum of 0 and sum of 0. For pane Sum of 0: Color shows details about Category.

- **Heavy Revenue Concentration:** Electronics commands the overwhelming majority of total business revenue at ₹2,516.8 Cr (₹25,16,83,65,850).
- **Top 3 Core Revenue Pillars:** Electronics, Furniture (₹287.7 Cr), and Home Appliances (₹160.7 Cr) collectively form the core financial engine of the business.
- **Long-Tail Optimization:** Clothing, Footwear, and Home & Living generate steady mid-tier returns, while Books, Kitchen, and Accessories present opportunities for cross-selling expansion.
- **Total Ecosystem Sales:** Overall sales revenue across all categories stand at ₹3,328.5 Cr (₹33,28,49,21,501).

4. Revenue Growth Rate

The plot of % Difference in Sale Revenue for Date Month. Color shows % Difference in Sale Revenue. The marks are labeled by % Difference in Sale Revenue. The view is filtered on % Difference in Sale Revenue, which keeps non-Null values only.

- **Peak Growth Performance:** Achieved maximum MoM revenue expansion in February 2025 (+9.08%) and February 2026 (+8.39%).
- **Steady Volatility Range:** Baseline month-over-month growth fluctuates within a healthy, predictable band of -4.75% to +4.68%.
- **Seasonal Recovers:** Sharp pullbacks (such as -9.03% in early 2025) are consistently followed by immediate, high-volume growth rebounds.
- **Active Month Partial Reporting:** August 2026 reflects -48.34% due to in-progress data collection for the current cycle.

- **Robust Financial Baseline:** Achieved total revenue of ₹3,328.5 Cr, driven by steady monthly revenue averaging ~₹106 Cr between Dec 2023 and Aug 2026.
- **Electronics-Driven Portfolio:** Electronics leads overall performance at ₹2,516.8 Cr, with Furniture and Home Appliances forming the remaining core revenue pillars.
- **Q2 Expansion & Peak Sales:** Record monthly sales reached ₹110 Cr in Aug 2024, with March consistently generating top MoM growth rates (+9.08% in 2025, +8.39% in 2026).
- **Predictable MoM Growth:** Baseline month-over-month revenue performance fluctuates safely between -4.75% and +4.68%, demonstrating high stability.

Top 10 Products

Bottom 10 Products

- **Dominant Flagship Item:** Laptop leads all product sales at ₹1,069.6 Cr, generating more revenue than the bottom 10 products combined.
- **Tech-Centric Revenue Top 4:** High-ticket consumer electronics (Laptops, Smartphones, Tablets, Smart Watches) drive the vast majority of catalog sales revenue.
- **Lowest Revenue Tier:** Books represents the lowest-grossing product at ₹11.1 Cr, followed by low-ticket apparel and accessories like Wallets (₹17.4 Cr) and T-shirts (₹18.1 Cr).
- **Catalog Rebalancing Opportunity:** Low-revenue items like Books, Wallets, and T-shirts require targeted bundled promotions or pricing adjustments to boost basket size.

6. Quantity Sold vs. Sales Revenue Matrix

Product, sum of Quantity and sum of Sale Revenue. Color shows sum of Sale Revenue. Size shows sum of Quantity. The marks are labeled by Product, sum of Quantity and sum of Sale Revenue. Details are shown for Product.

- **Uniform Demand Distribution:** All 20+ products maintain tight unit volume consistency between ~1.64L and 1.66L units sold.
- **Revenue Driven by Pricing Strategy:** Laptop leads revenue at ₹1,069.6 Cr, generating over 96x more sales value than Books (₹11.1 Cr) despite nearly equal unit movement.
- **High-Volume, Low-Margin Products:** Books, Wallets, and T-shirts absorb high logistical handling (1.65L+ units each) while contributing less than ₹20 Cr each to total revenue.
- **Strategic Optimization:** Focus on upselling and bundling low-ticket items (Books/Apparel) with high-ticket electronics (Laptops/Smartphones) to maximize average order value.

7. Product Price Distribution

Distinct count of Product for each Price Band (₹). The marks are labeled by distinct count of Product.

- **Low-Ticket Inventory Dominance:** The product portfolio is concentrated in entry-level pricing, with the <₹1K price band leading at 14 distinct products.
- **Rapid Catalog Tapering:** Over 60% of distinct catalog products are priced below ₹10K, showing steep decline as price points increase.
- **Stable Mid-Tier Pricing:** Product variety plateaus evenly between ₹16K and ₹45K with 2-3 products per price bin.
- **Sparse Premium Tier:** High-ticket products above ₹75K are ultra-focused, consisting of only 1 flagship product per price bin (driving high revenue despite low price variety).

8. Category Volume vs. Revenue Split

Quantity and Sale Revenue for each Category. Color shows details about Quantity and Sale Revenue. The marks are labeled by Quantity and Sale Revenue. Details are shown for Quantity and Sale Revenue.

- **Electronics Dominates Scale:** Leads both volume and value, contributing 8.27 Lakh units sold and ₹2,516.8 Cr in total sales revenue.
- **High Volume vs. Low Monetization:** Clothing achieves the second highest volume (4.94 lakh units), but lower pricing yields just ₹103.7 Cr in total revenue.
- **Consistent Volume Plateau:** Five core categories (Footwear, Furniture, Home Appliances, Home & Living, Accessories) each maintain steady volume around ~3.3 Lakh units.
- **High Unit-Value Return:** Furniture generates ₹287.7 Cr on 3.28 Lakh units, making it the second most lucrative revenue generator despite moderate sales volume.

- **Entry-Level Product Concentration:** Catalog variety is heavily concentrated in low-ticket items, led by 14 distinct products under ₹1,000 and over 60% of items under ₹10,000.
- **Electronics Drives Strategic Value:** High-ticket inventory (₹46K-₹85K+) maintains low product variety (1-2 products per bin) but powers Electronics to lead overall performance at ₹2,516.8 Cr.
- **Volume vs. Revenue Mismatch:** Fast-moving consumer categories like Clothing (4.94L units) generate substantial order volume but lower revenue (₹103.7 Cr) due to low-bin price concentration.⁴
- **Balanced Mid-Tier Margin Strategy:** Categories priced within the ₹16K-₹45K mid-tier plateau deliver optimal revenue per unit sold.

9. Sales Distribution Map by City

Map based on Longitude (generated) and Latitude (generated). Color shows distinct count of Order ID. Size shows sum of Sale Revenue. Details are shown for City and City. The view is filtered on Latitude (generated) and Longitude (generated). The Latitude (generated) filter keeps non-Null values only. The Longitude (generated) filter keeps non-Null values only.

- **Uniform Geographical Performance:** Sales revenue across all target cities stays tightly grouped between ₹162.6 Cr and ₹170.1 Cr.
- **Consistent Demand Across Cities:** Distinct order counts per city remain virtually even, spanning 54.6K to 55.2K orders per region.
- **Balanced Pan-India Footprint:** Revenue generation is well distributed across Northern, Western, Southern, and Eastern urban clusters without over-reliance on a single metropolitan market.
- **Logistics & Inventory Efficiency:** Equal volume movement across cities allows for standardized regional warehouse stocking and fulfillment planning.

10. Top Cities Revenue Breakdown Stacked Bar

Sum of Sale Revenue for each City. Color shows details about Category. The marks are labeled by sum of Sale Revenue. The view is filtered on City, which keeps 10 of 20 members.

- **Uniform Revenue Distribution:** Top 10 cities deliver virtually identical total revenue, led by Kochi at ₹129.9 Cr and bounded by Chennai at ₹126.0 Cr.
- **Electronics Overwhelmingly Leads:** Electronics accounts for over 75% of total city revenue across all top markets, driving ~₹1,250 Cr+ per city.
- **Equally Performing Metro & Tier-2 Markets:** Non-metro regional centers (Kochi, Bhopal, Lucknow, Surat, Rajkot) generate equal or higher revenue compared to major metros (Mumbai, Hyderabad, Chennai).
- **Consistent Cross-Category Demand:** Non-electronic categories exhibit an identical category split in every city, proving that customer demand patterns are uniform across geographic markets.

11. Average Spend per Order by City

Average Order Value for each City. The marks are labeled by Average Order Value.

- **High Uniformity in Order Value:** Average order spend per city stays extraordinarily flat across India, holding tightly between ₹29.5K and ₹30.8K.
- **Tier-2 Markets Outpace Major Metros in AOV:** Kochi (₹30,798), Bhopal (₹30,584), and Lucknow (₹30,571) outrank key metro hubs like Delhi, Bengaluru, and Hyderabad in average ticket size.
- **Nationwide Revenue Consistency:** Purchasing power per transaction remains uniform regardless of region, city tier, or geographical cluster.
- **Standardized Pricing & Promotional Strategy:** Consistent AOV across all 20 cities allows for uniform pricing, bundling, and minimum order threshold policies across the entire network.

Category

- **High Geographical Market Consistency:** Top city sales range tightly between ₹126.0 Cr (Chennai) and ₹129.9 Cr (Kochi), while Average Order Value (AOV) spans ₹29.5K to ₹30.8K nationwide.
- **Tier-2 Urban Hubs Lead Performance:** Non-metro markets like Kochi (₹30,799 AOV), Bhopal (₹30,584 AOV), and Lucknow (₹30,571 AOV) match or exceed top metros (Mumbai, Delhi, Bengaluru) in spend per transaction.
- **Electronics Powered Growth:** Electronics generates over 75% of total city revenue across top markets, driving over ₹1,250 Cr per city.
- **Standardized Pricing & Supply Chain Operations:** Uniform purchasing behavior across all regions allows for nationwide fulfillment strategies, centralized inventory planning, and standardized promotional pricing.

12. Order Size Distribution

Distinct count of Order ID for each Items per Order (bin). The marks are labeled by distinct count of Order ID.

- **Near-Equal Order Volume Across Basket Sizes:** Total order count is evenly distributed across 1 to 5 items per order, holding steadily at ~2.2 Lakh orders per bin.
- **Peak Demand at 3 Items per Order:** Orders containing 3 items form the largest individual volume bin at 2,20,727 distinct orders.
- **Strong Standalone & Multi-Item Demand:** Single-item purchases (2,20,007 orders) match 4-item purchases (2,20,077 orders) nearly 1:1 in total volume.
- **Consistent Packaging & Fulfillment Load:** Low variance across order sizes (~0.5% difference between top and bottom bins) supports standardized warehouse packing processes and predictable shipping materials management.

13. Pareto Analysis Chart

The trends of Sale Revenue and % of Total Running Sum of Sale Revenue along Category for Category. Color shows details about Sale Revenue and % of Total Running Sum of Sale Revenue along Category. For pane % of Total Running Sum of Sale Revenue: The marks are labeled by % of Total Running Sum of Sale Revenue along Category.

- **Electronics Drives The Core Business:** Electronics alone accounts for 75.61% of total cumulative sale revenue, exceeding ₹25B (₹2,500 Cr+).
- **80/20 Revenue Concentration:** The top two categories—Electronics and Furniture—combine to generate 84.26% of overall revenue.
- **Top 3 Categories Reach ~90% Share:** Adding Home Appliances brings total cumulative revenue contribution to 89.09%.
- **Strategic Focus Area:** Resource allocation, inventory investment, and marketing strategies should remain heavily focused on Electronics, Furniture, and Home Appliances to protect ~90% of business revenue.

14. Daily Sales Volatility Scatter Plot

Distinct count of Order ID vs. sum of Sale Revenue. Details are shown for Date.

- **Linear Volume-to-Revenue Growth:** Daily sales revenue increases predictably alongside daily order counts, following a strong positive trend line.
- **Tight Daily Volume Clustering:** Standard business operations consistently process between 1,080 and 1,220 orders per day.
- **Widely Revenue Spread per Volume Tier:** Daily sales revenue varies between ₹2.8 Cr and ₹4.2 Cr at equal order volumes, driven by variation in basket composition and high-ticket item sales.
- **Peak Revenue Multipliers:** Exceptional sales days peak above ₹4.2 Cr in daily revenue, demonstrating high upside potential on high-ticket sales days.

- **Standardized Customer Order Volumes:** Total order distribution spans tightly between 2.19 Lakh and 2.20 Lakh orders across all 1-to-5 item basket bins, peaking at 3 items per order (2,20,27 orders).
- **Core revenue Anchored by Electronics:** Electronics accounts for 75.61% of cumulative sales revenue (>₹25 Billion / ₹2,500 Cr+), while the top 3 categories (Electronics, Furniture, and Home Appliances) combine for 89.09% of total revenue.
- **Linear Daily Revenue Trajectory:** Daily sales revenue correlates directly with order count along a strong positive trend line, with regular business operations processing 1,080 to 1,220 orders per day.
- **Daily Basket Mix Drives Revenue Spikes:** Daily revenue fluctuates by up to ₹1.4 Cr at constant daily order volumes, demonstrating that high-ticket item sales (Electronics) are the primary engine for peak revenue days (₹4.2 Cr+).
